Chu: To Amanda, Alvin and Alice for their loving support.

Peretto: To Lenore who always supported me.

Contents

Preface	ix
1 Introduction	1
1.1 Motivation, background and goal	1
1.2 Innovation, knowledge, and the Industrial Revolution	2
1.3 Schumpeterian growth theory and its evolution	3
1.4 Endogenous market structure and endogenous growth	4
1.5 Relation to Unified Growth Theory	4
1.6 Empirical evidence on the Great Acceleration and the Great Divergence	5
1.7 Contribution of the book	11
1.8 Structure of the book	12
2 Schumpeterian growth with creative accumulation	15
2.1 Motivation, background and goal	15
2.2 The model	17
2.3 Intermediate goods and in-house R&D	19
2.4 Economic growth	22
2.5 Summary	25
3 Entry and product variety expansion	27
3.1 Motivation, background and goal	27
3.2 The model	28
3.3 Entrants	29
3.4 Economic growth in general equilibrium	30
3.5 Tractable semi-endogenous growth	33
3.6 Summary	35
4 Schumpeterian growth with endogenous market structure	37
4.1 Motivation, background and goal	37

4.2	The model	39
4.3	Economic growth	39
4.4	Dynamics of firm size	40
4.5	Patent policy and economic growth	42
4.6	Summary	45
5	Schumpeterian growth with endogenous takeoff	47
5.1	Motivation, background and goal	47
5.2	The model: three phases of growth	49
5.3	Dynamics from stagnation to growth	53
5.4	Summary	55
5.5	Appendix: an alternative regime of the Schumpeterian model	56
6	Government: rent-seeking vs. productive	59
6.1	Motivation, background and goal	60
6.2	A Schumpeterian model with rent-seeking government	62
6.3	Rent-seeking government	64
6.4	Rent-seeking government and endogenous takeoff	65
6.5	Productive government spending	72
6.6	Summary	75
7	Corporate governance	77
7.1	Motivation, background and goal	77
7.2	A Schumpeterian model with corporate governance	80
7.3	Corporate governance and endogenous takeoff	82
7.4	Summary	88
8	Status-seeking culture	91
8.1	Motivation, background and goal	91
8.2	A Schumpeterian model with status-seeking culture	93
8.3	Dynamics of the consumption-output ratio	97
8.4	Status-seeking culture and the interest rate	97
8.5	Status-seeking culture and endogenous takeoff	98
8.6	Dynamics from stagnation to growth	102
8.7	Empirical evidence	105
8.8	Summary	105
9	Structural change	107
9.1	Motivation, background and goal	107
9.2	A Schumpeterian model with structural change	109
9.3	Intermediate goods and in-house R&D	111

<i>Contents</i>	vii
9.4 Entrants	112
9.5 Aggregate production function	112
9.6 Labor allocation	112
9.7 Agricultural revolution and endogenous takeoff	113
9.8 International trade and structural change	122
9.9 Summary	124
10 Natural resources	127
10.1 Motivation, background and goal	128
10.2 A Schumpeterian model with natural resources	130
10.3 Aggregate production function and factors allocation	133
10.4 Natural resources and endogenous takeoff	134
10.5 Dynamic effects of the discovery of natural resources	139
10.6 Disposing of the early negative growth	142
10.7 Resource curse with agricultural trade	143
10.8 Summary	144
11 Diseases, economic growth and industrial takeoff	147
11.1 Motivation, background and goal	147
11.2 Effects of the Black Death	149
11.3 From stagnation to growth	153
11.4 The long echo of the Black Death	156
11.5 The disease environment	156
11.6 Summary	162
12 Heterogeneous households and income inequality	165
12.1 Motivation, background and goal	165
12.2 A Schumpeterian model with heterogeneous households	167
12.3 Dynamics of the aggregate economy	169
12.4 The wealth distribution	172
12.5 The income distribution	173
12.6 From inequality to growth	175
12.7 Summary	178
13 Endogenous fertility and demographic transition I	181
13.1 Motivation, background and goal	181
13.2 A Schumpeterian model with endogenous fertility	183
13.3 Fertility dynamics in the industrial era	187
13.4 Demographic transition from stagnation to growth	188
13.5 Summary	194

14	Endogenous fertility and demographic transition II	197
14.1	Motivation, background and goal	197
14.2	The modified model	199
14.3	The fertility transition	203
14.4	Discussion	207
14.5	A failure to launch scenario	209
14.6	Summary	210
15	Conclusion	213
